

Open data maturity

2024 country factsheet

State of play at a glance

A key initiative in France's open data strategy is the Data Roadmap for Ecological Planning, which integrates data from sectors like energy, transportation and waste management to support sustainable decision-making. This roadmap aids policymakers, businesses and citizens by providing valuable data to advance environmental goals. Additionally, the Data and Territories Report enhances regional data access, promoting transparency and empowering local communities. France has also co-developed a Digital and Data Roadmap, with input from over 300 public employees to guide national and local digital transformation.

Governance is led by the Interministerial Digital Directorate, with support from general data administrators and ministerial data administrators. Public engagement is fostered through events, consultations and feedback mechanisms on data.gouv.fr, promoting an adaptive open data ecosystem.

Assessment methodology

Open data maturity is measured on four thematic dimensions: policy, portal, quality and impact. Each dimension contributes an equal 25 % towards the overall maturity score.

Policy
Investigates the open data policies and strategies in place in the countries, the national governance models for managing open data and the measures applied to implement those policies and strategies.

Portal
Investigates the functionality of national open data portals, the extent to which users' needs and behaviour are examined to improve the portal, the availability of open data across different domains and the approach to ensuring the portal's sustainability.

Quality
Investigates the measures adopted by portal managers to ensure the systematic harvesting of metadata, the monitoring of metadata quality and compliance with the DCAT-AP metadata standard and the quality of the deployment of the published data on the national portal.

Impact
Investigates how well countries define and measure data reuse, the steps taken to assess reuse and user needs and the presence of reuse examples in the domains of government, society, the environment and the economy.

2024 maturity scores of France

Maturity scores of France over time

Policy dimension

2024 policy maturity scores of France

Key questions

- Does the national open data policy/strategy include an action plan?  Yes
- To what degree do local/regional public bodies conduct open data initiatives?  All
- Are there processes to ensure that the open data policies/strategy are implemented?  Yes

Portal dimension

2024 portal maturity scores of France

Key questions

- Do you monitor the portal's traffic?  Yes
- To what degree do public sector data providers contribute data to the portal?  All
- Does the national portal allow users to see what data exists but cannot be made available as open data?  Yes

Quality dimension

2024 quality maturity scores of France

Key questions

- Do you monitor the quality of the metadata available on your portal?  Yes
- Do you set any standards on metadata quality that data providers must abide by?  Yes
- Do you use a model to assess the quality of deployment of data in your country?  Yes

Impact dimension

2024 impact maturity scores of France

Key questions

- Do you have a definition of open data reuse in your country?  Yes
- Are there any processes in place to monitor the level of reuse of your country's open data?  Yes
- Do you have a methodology in place to measure the impact of open data?  Yes
