

# Open data maturity

2024 country factsheet

## State of play at a glance

A key milestone has been the development of a new open data portal. It enhances the accessibility and usability of open data, including the possibility for members of the open data community to add their reuse cases. Additionally, Slovakia has actively integrated new local portals, expanding the availability of open data across the country. There has also been progress in harvesting open data from the biggest municipalities by the national open data portal.

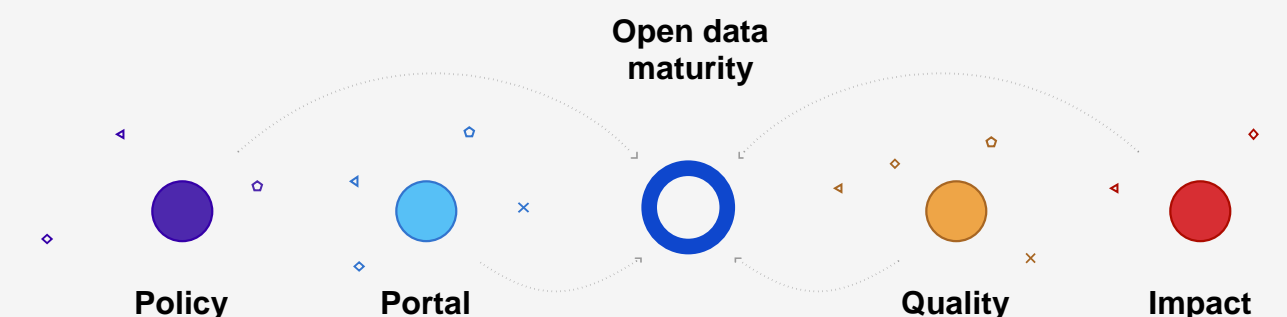

Another key development is the publication of the 2024 Open Data Impact report, informing on:

- number of dataset downloads and API access to high-value datasets (HVD);
- ratio of users;
- who are the users of HVD datasets;
- new use cases which use HVD datasets.

# Assessment methodology

Open data maturity is measured on four thematic dimensions: policy, portal, quality and impact. Each dimension contributes an equal 25 % towards the overall maturity score.

**Policy**  
Investigates the open data policies and strategies in place in the countries, the national governance models for managing open data and the measures applied to implement those policies and strategies.

**Portal**  
Investigates the functionality of national open data portals, the extent to which users’ needs and behaviour are examined to improve the portal, the availability of open data across different domains and the approach to ensuring the portal’s sustainability.

**Quality**  
Investigates the measures adopted by portal managers to ensure the systematic harvesting of metadata, the monitoring of metadata quality and compliance with the DCAT-AP metadata standard and the quality of the deployment of the published data on the national portal.

**Impact**  
Investigates how well countries define and measure data reuse, the steps taken to assess reuse and user needs and the presence of reuse examples in the domains of government, society, the environment and the economy.

2024 maturity scores of Slovakia

Maturity scores of Slovakia over time

# Policy dimension

2024 policy maturity scores of Slovakia

## Key questions

- Does the national open data policy/strategy include an action plan?  Yes
- To what degree do local/regional public bodies conduct open data initiatives?  About half
- Are there processes to ensure that the open data policies/strategy are implemented?  Yes

# Portal dimension

2024 portal maturity scores of Slovakia

## Key questions

- Do you monitor the portal's traffic?  Yes
- To what degree do public sector data providers contribute data to the portal?  Majority
- Does the national portal allow users to see what data exists but cannot be made available as open data?  Yes

# Quality dimension

2024 quality maturity scores of Slovakia

## Key questions

- Do you monitor the quality of the metadata available on your portal?  Yes
- Do you set any standards on metadata quality that data providers must abide by?  Yes
- Do you use a model to assess the quality of deployment of data in your country?  Yes

# Impact dimension

2024 impact maturity scores of Slovakia

## Key questions

- Do you have a definition of open data reuse in your country?  Yes
- Are there any processes in place to monitor the level of reuse of your country's open data?  Yes
- Do you have a methodology in place to measure the impact of open data?  Yes
