# Open data maturity

## 2024 country factsheet

## State of play at a glance

One significant development is the new system encouraging opening of data, supported by a systemic source of funding for this activity. This initiative aims to promote the availability and use of open data across various sectors.
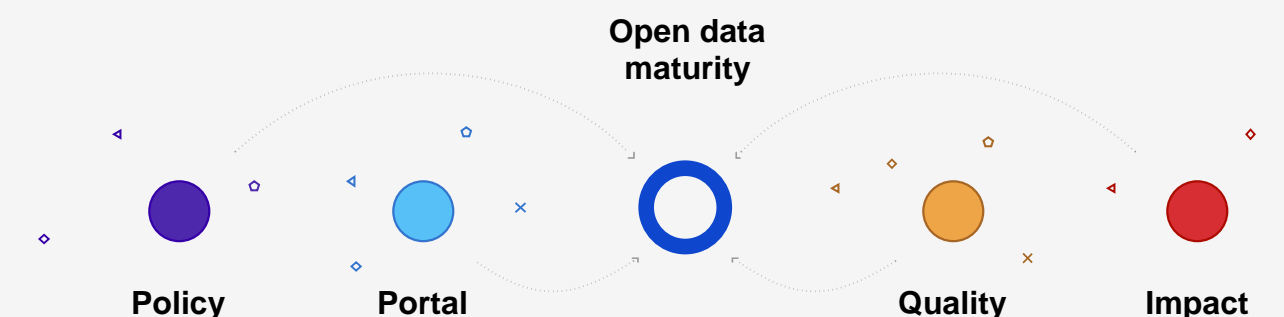

Additionally, new monitoring frameworks were added as upgrades to the Slovenian Open data portal. This includes an upgrade to the Matomo software used on the portal, which the open data team uses to acquire analytics regarding their open data portal (e.g. which datasets are most visited).

Amendments to the Slovenian Public Information Act are currently underway, including mandates that public bodies that create or obtain dynamic data in the performance of public tasks shall enable their reuse immediately after they are collected, and enable their mass transfer or transfer via APIs.

## Assessment methodology

**Open data maturity is measured on four thematic dimensions: policy, portal, quality and impact. Each dimension contributes an equal 25 % towards the overall maturity score.**

**Policy**
Investigates the open data policies and strategies in place in the countries, the national governance models for managing open data and the measures applied to implement those policies and strategies.

**Portal**
Investigates the functionality of national open data portals, the extent to which users' needs and behaviour are examined to improve the portal, the availability of open data across different domains and the approach to ensuring the portal's sustainability.
**Quality**
Investigates the measures adopted by portal managers to ensure the systematic harvesting of metadata, the monitoring of metadata quality and compliance with the DCAT-AP metadata standard and the quality of the deployment of the published data on the national portal.
**Impact**
Investigates how well countries define and measure data reuse, the steps taken to assess reuse and user needs and the presence of reuse examples in the domains of government, society, the environment and the economy.
