

# Open data maturity

## 2025 country factsheet

### State of play at a glance

Hungary's open data governance structure was further consolidated in 2025 through the continued institutional development of the National Data Asset Management Agency (NAVÜ), now operating under the Central Statistical Office. This transition led to a reorganisation of NAVÜ's management and strengthened professional ties with the Central Statistical Office.

In cooperation with the Ministry of Justice, NAVÜ completed the implementation of an EU-funded project, which included training over 200 government employees in data-based decision-making using the Data Platform IT application developed by NAVÜ. Government decrees adopted in 2024 operationalised legislation introduced the previous year, supporting the legal framework for national data asset utilisation.

# Assessment methodology

Open data maturity is measured on four thematic dimensions: policy, portal, quality and impact. Each dimension contributes an equal 25 % towards the overall maturity score.

**Policy**  
Investigates the open data policies and strategies in place in the countries, the national governance models for managing open data and the measures applied to implement those policies and strategies.

**Portal**  
Investigates the functionality of national open data portals, the extent to which users’ needs and behaviour are examined to improve the portal, the availability of open data across different domains and the approach to ensuring the portal’s sustainability.

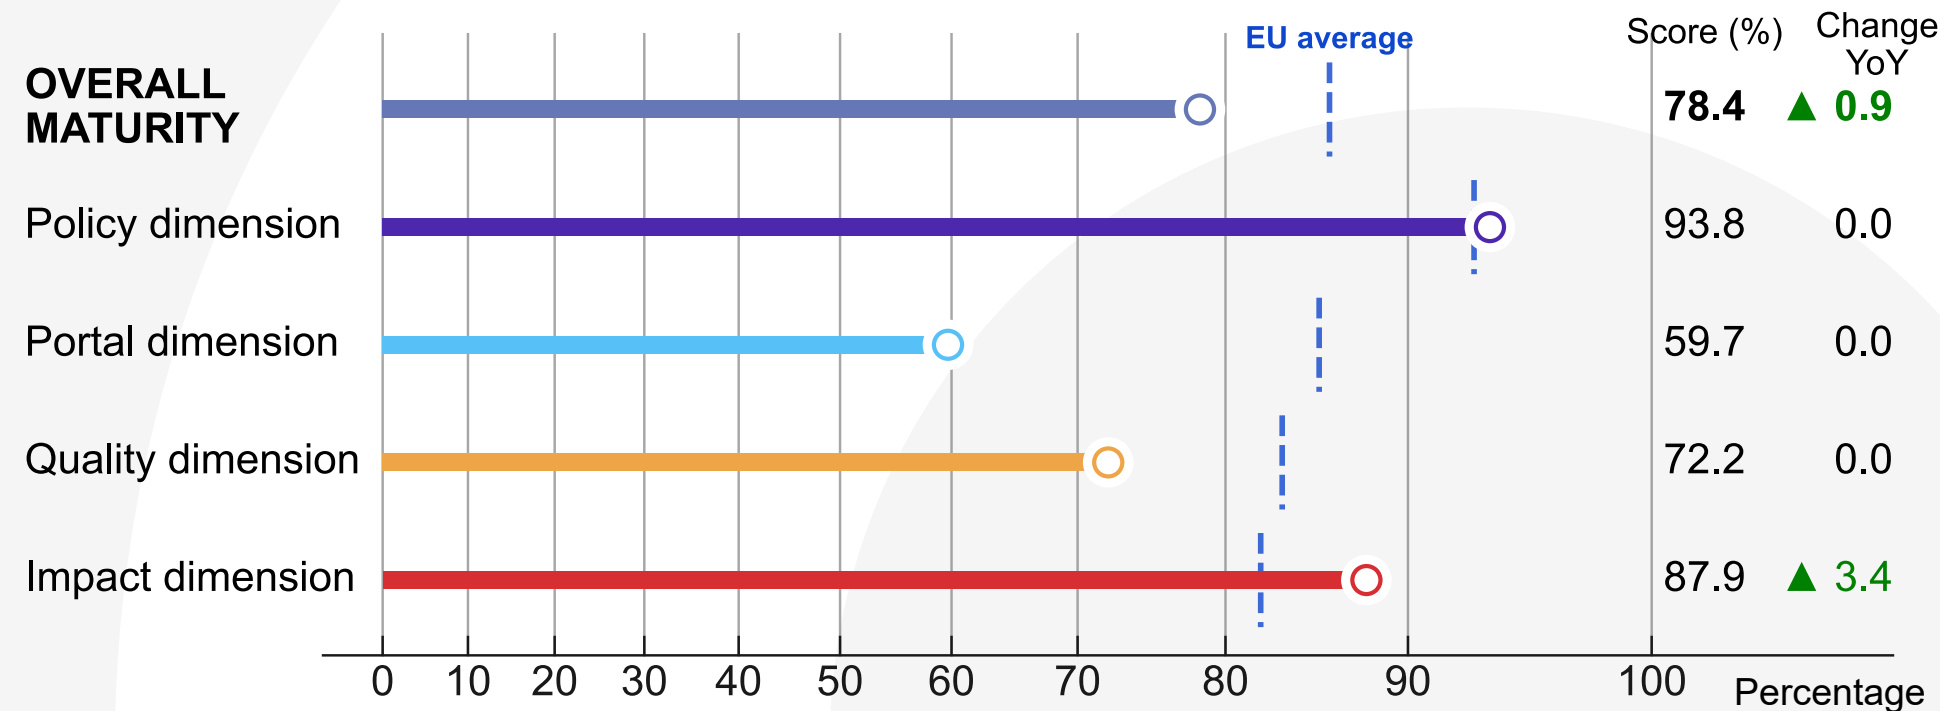

**Quality**  
Investigates the measures adopted by portal managers to ensure the systematic harvesting of metadata, the monitoring of metadata quality and compliance with the DCAT-AP metadata standard and the quality of the deployment of the published data on the national portal.

**Impact**  
Investigates how well countries define and measure data reuse, the steps taken to assess reuse and user needs and the presence of reuse examples in the domains of government, society, the environment and the economy.

2025 maturity scores of Hungary

Maturity scores of Hungary over time

Policy dimension

2025 policy maturity scores of Hungary

Key questions

- Does the national open data policy/strategy include an action plan?  Yes
- To what degree do local/regional public bodies conduct open data initiatives?  All
- Are there processes to ensure that the open data policies/strategy are implemented?  Yes

Portal dimension

2025 portal maturity scores of Hungary

Key questions

- Do you monitor the portal's traffic?  Yes
- To what degree do public sector data providers contribute data to the portal?  About half
- Does the national portal allow users to see what data exists but cannot be made available as open data?  Yes

Quality dimension

2025 quality maturity scores of Hungary

Key questions

- Do you monitor the quality of the metadata available on your portal?  Yes
- Do you set any standards on metadata quality that data providers must abide by?  Yes
- Do you use a model to assess the quality of deployment of data in your country?  No

Impact dimension

2025 impact maturity scores of Hungary

Key questions

- Do you have a definition of open data reuse in your country?  Yes
- Are there any processes in place to monitor the level of reuse of your country's open data?  Yes
- Do you have a methodology in place to measure the impact of open data?  Yes
