

# Open data maturity

## 2025 country factsheet

## State of play at a glance

Lithuania advanced its open data ecosystem through legislative reform, strategic investment and technical modernisation. The revised Law on the Right to Receive Information and Re-use of Data extended open data obligations to 274 state- and municipally managed private companies, effective November 2024. This was complemented by the Nineteenth Government's Programme, which reaffirmed open data as a strategic priority, and by the State Digital Solutions Agency's ongoing project to create a unified metadata catalogue for all public sector data.

The national portal data.gov.lt saw major upgrades, including improved reliability, segmented data sections (public, non-public, restricted), geospatial data integration from geoportal.lt and strengthened security via double authentication. Accountability was enhanced through clearer creator and publisher roles, and the number of high-value datasets rose to 386. Lithuania also made notable progress in metadata quality, aligning formats with European standards and advancing from 3-star to 4- and 5-star levels on the Berners-Lee maturity model through RDF availability and semantic web compatibility.

To support innovation, the Ministry of Economy and Innovation allocated EUR 4.11 million to businesses developing open-data-based digital services. Additionally, an investment project was launched to modernise the Official Statistics Portal, aiming to improve usability, visualisation and cross-platform integration by 2026 under the 'New Generation Lithuania' plan and NextGenerationEU funding.

# Assessment methodology

Open data maturity is measured on four thematic dimensions: policy, portal, quality and impact. Each dimension contributes an equal 25 % towards the overall maturity score.

**Policy**  
Investigates the open data policies and strategies in place in the countries, the national governance models for managing open data and the measures applied to implement those policies and strategies.

**Portal**  
Investigates the functionality of national open data portals, the extent to which users’ needs and behaviour are examined to improve the portal, the availability of open data across different domains and the approach to ensuring the portal’s sustainability.

**Quality**  
Investigates the measures adopted by portal managers to ensure the systematic harvesting of metadata, the monitoring of metadata quality and compliance with the DCAT-AP metadata standard and the quality of the deployment of the published data on the national portal.

**Impact**  
Investigates how well countries define and measure data reuse, the steps taken to assess reuse and user needs and the presence of reuse examples in the domains of government, society, the environment and the economy.

2025 maturity scores of Lithuania

Maturity scores of Lithuania over time

Policy dimension

2025 policy maturity scores of Lithuania

Key questions

- Does the national open data policy/strategy include an action plan? ☒ Yes
- To what degree do local/regional public bodies conduct open data initiatives? ☒ All
- Are there processes to ensure that the open data policies/strategy are implemented? ☒ Yes

Portal dimension

2025 portal maturity scores of Lithuania

Key questions

- Do you monitor the portal's traffic? ☒ Yes
- To what degree do public sector data providers contribute data to the portal? ☒ Majority
- Does the national portal allow users to see what data exists but cannot be made available as open data? ☒ Yes

Quality dimension

2025 quality maturity scores of Lithuania

Key questions

- Do you monitor the quality of the metadata available on your portal? ☒ Yes
- Do you set any standards on metadata quality that data providers must abide by? ☒ Yes
- Do you use a model to assess the quality of deployment of data in your country? ☒ Yes

Impact dimension

2025 impact maturity scores of Lithuania

Key questions

- Do you have a definition of open data reuse in your country? ☒ Yes
- Are there any processes in place to monitor the level of reuse of your country's open data? ☒ Yes
- Do you have a methodology in place to measure the impact of open data? ☒ Yes
