Slovakia

Open data maturity

2025 country factsheet

## State of play at a glance

Slovakia continued to strengthen its open data ecosystem through targeted improvements in policy, portal functionality and data quality. The country advanced implementation of high-value datasets via portal updates, DCAT-AP-SK alignment and working group meetings. The national portal introduced new features such as updated dataset forms, improved data services and enhanced community engagement tools including notifications for likes, comments and suggestions. Quality efforts included meetings with data providers, the launch of a metadata quality page and the introduction of warning icons to flag issues. A minimum publication requirement for municipalities was also reinforced.

A user satisfaction survey was embedded in the portal header to gather feedback on data quality and usability. Capacity-building activities included trainings and a dedicated workshop for university students, reflecting a growing emphasis on reuse and stakeholder engagement.

Open data maturity

Policy   Portal   Quality   Impact

Slovakia

Assessment methodology

Open data maturity is measured on four thematic dimensions: policy, portal, quality and impact. Each dimension contributes an equal 25 % towards the overall maturity score.

Policy
Investigates the open data policies and strategies in place in the countries, the national governance models for managing open data and the measures applied to implement those policies and strategies.

Portal
Investigates the functionality of national open data portals, the extent to which users' needs and behaviour are examined to improve the portal, the availability of open data across different domains and the approach to ensuring the portal's sustainability.
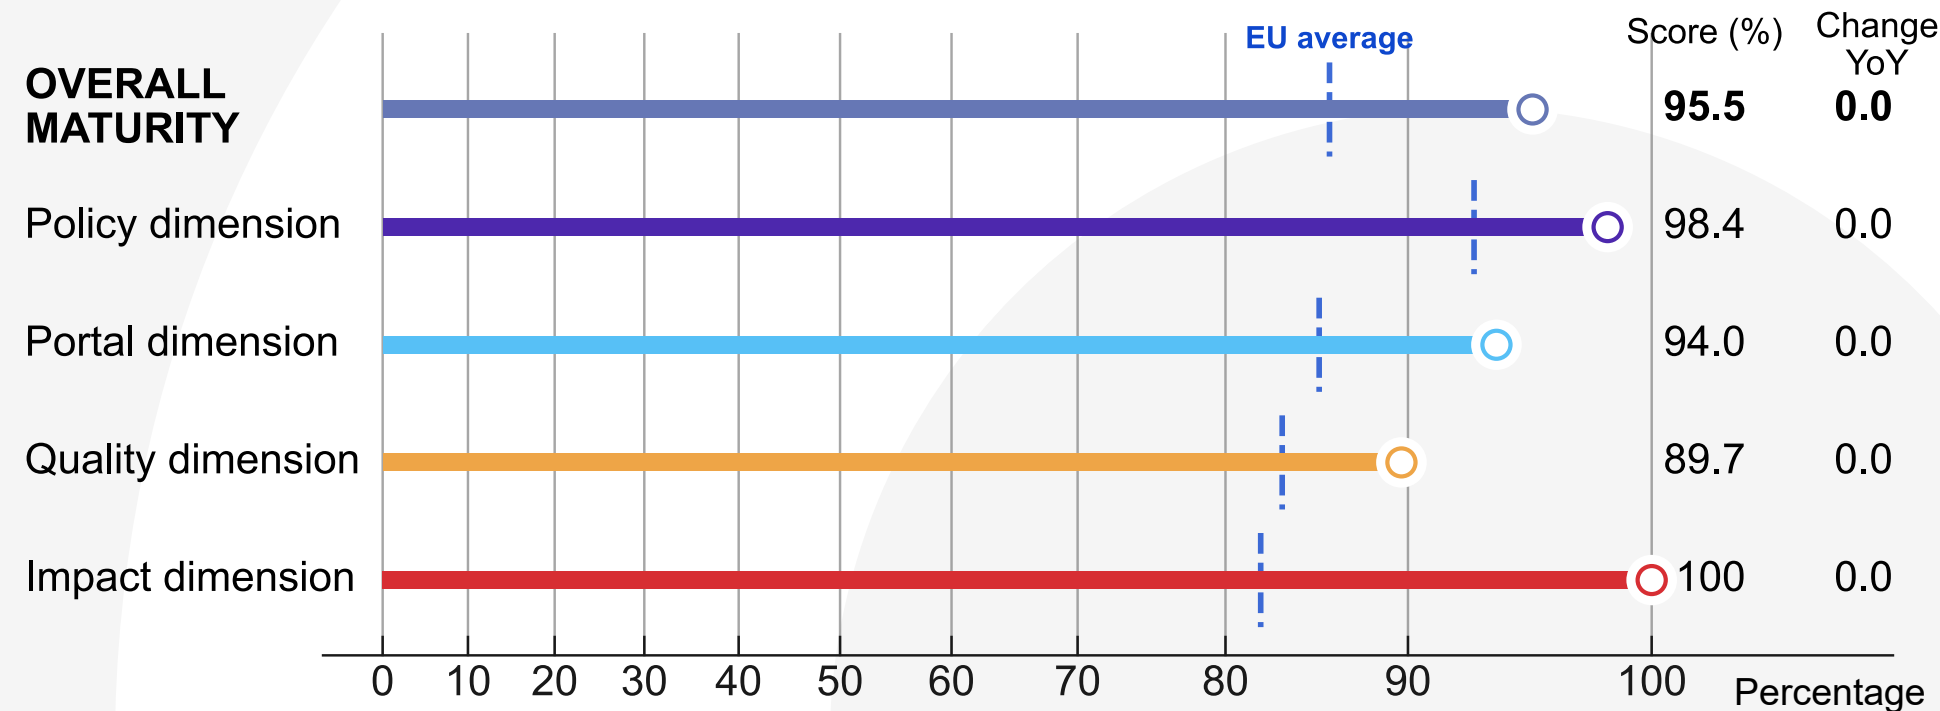

Quality
Investigates the measures adopted by portal managers to ensure the systematic harvesting of metadata, the monitoring of metadata quality and compliance with the DCAT-AP metadata standard and the quality of the deployment of the published data on the national portal.
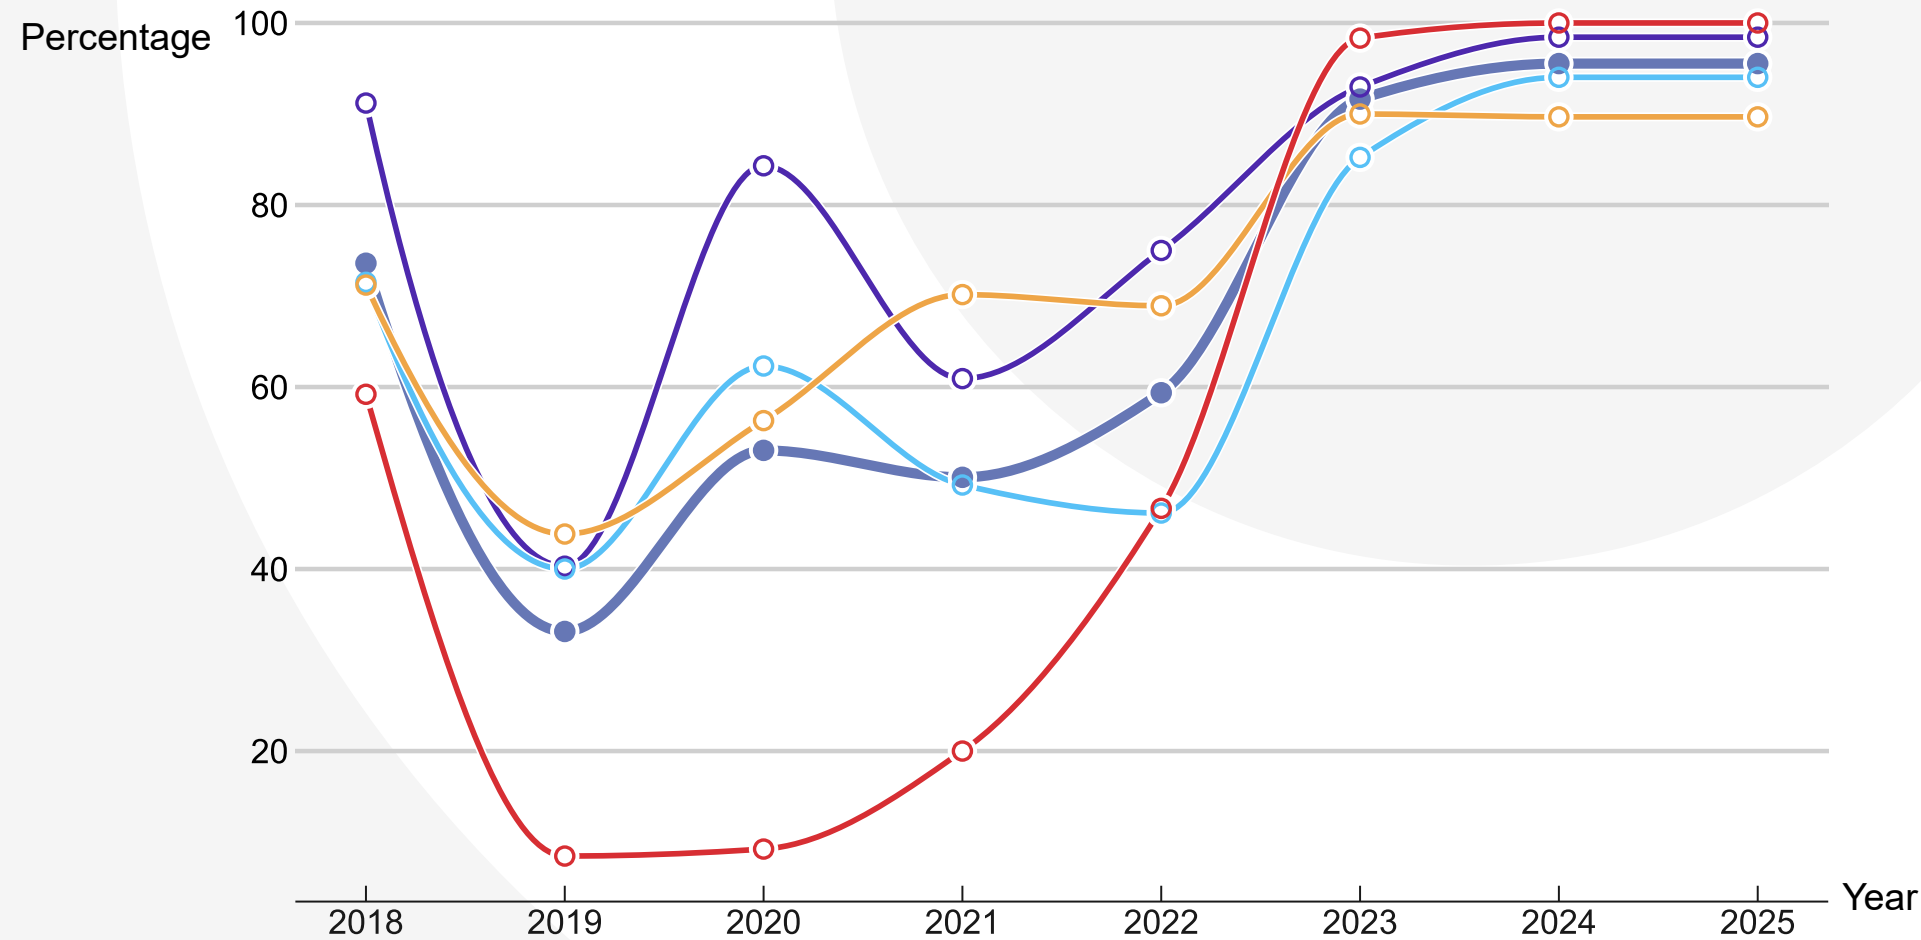

Impact
Investigates how well countries define and measure data reuse, the steps taken to assess reuse and user needs and the presence of reuse examples in the domains of government, society, the environment and the economy.
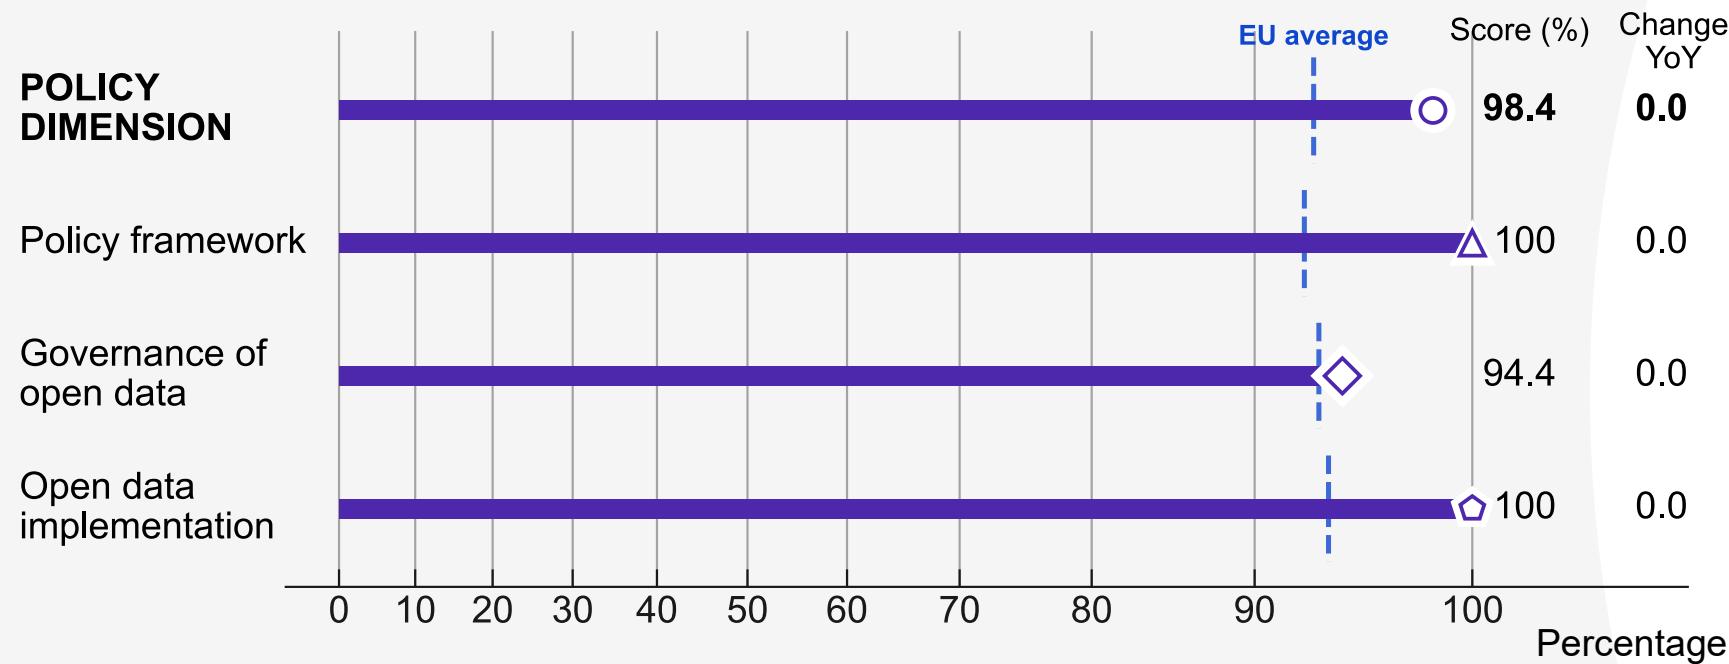

2025 maturity scores of Slovakia

	Score (%)	Change YoY
OVERALL MATURITY	95.5	0.0
Policy dimension	98.4	0.0
Portal dimension	94.0	0.0
Quality dimension	89.7	0.0
Impact dimension	100	0.0

Maturity scores of Slovakia over time

Slovakia

Policy dimension

2025 policy maturity scores of Slovakia

|	Score (%)	Change YoY
POLICY DIMENSION	**98.4**	**0.0**
Policy framework	100	0.0
Governance of open data	94.4	0.0
Open data implementation	100	0.0
