

Open data maturity

2025 country factsheet

State of play at a glance

Slovenia advanced its open data ecosystem through targeted research, portal upgrades and cross-sector engagement. Three national research projects were launched to strengthen the strategic, technical and economic foundations of open data: (1) a methodology for assessing data quality on the OPSI portal, (2) a maturity model and web solution to promote reuse in the Slovenian economy, and (3) a normative and organisational analysis of the open data domain.

The OPSI portal underwent significant technical upgrades, including migration to Bootstrap 5, enhanced security (XSS and Checkmarx fixes), support for protected data under the Data Governance Act (Regulation (EU) 2022/868), improved harvesting and API functionality and accessibility enhancements. Editor workflows were streamlined with CKEditor upgrades and email notifications.

Slovenia also hosted several events to foster dialogue and innovation, including conferences on open data and AI, privacy and the 'All Slovenian Hackathon' in early 2025.

Assessment methodology

Open data maturity is measured on four thematic dimensions: policy, portal, quality and impact. Each dimension contributes an equal 25 % towards the overall maturity score.

Policy
Investigates the open data policies and strategies in place in the countries, the national governance models for managing open data and the measures applied to implement those policies and strategies.

Portal
Investigates the functionality of national open data portals, the extent to which users’ needs and behaviour are examined to improve the portal, the availability of open data across different domains and the approach to ensuring the portal’s sustainability.

Quality
Investigates the measures adopted by portal managers to ensure the systematic harvesting of metadata, the monitoring of metadata quality and compliance with the DCAT-AP metadata standard and the quality of the deployment of the published data on the national portal.

Impact
Investigates how well countries define and measure data reuse, the steps taken to assess reuse and user needs and the presence of reuse examples in the domains of government, society, the environment and the economy.

2025 maturity scores of Slovenia

Maturity scores of Slovenia over time

Policy dimension

2025 policy maturity scores of Slovenia

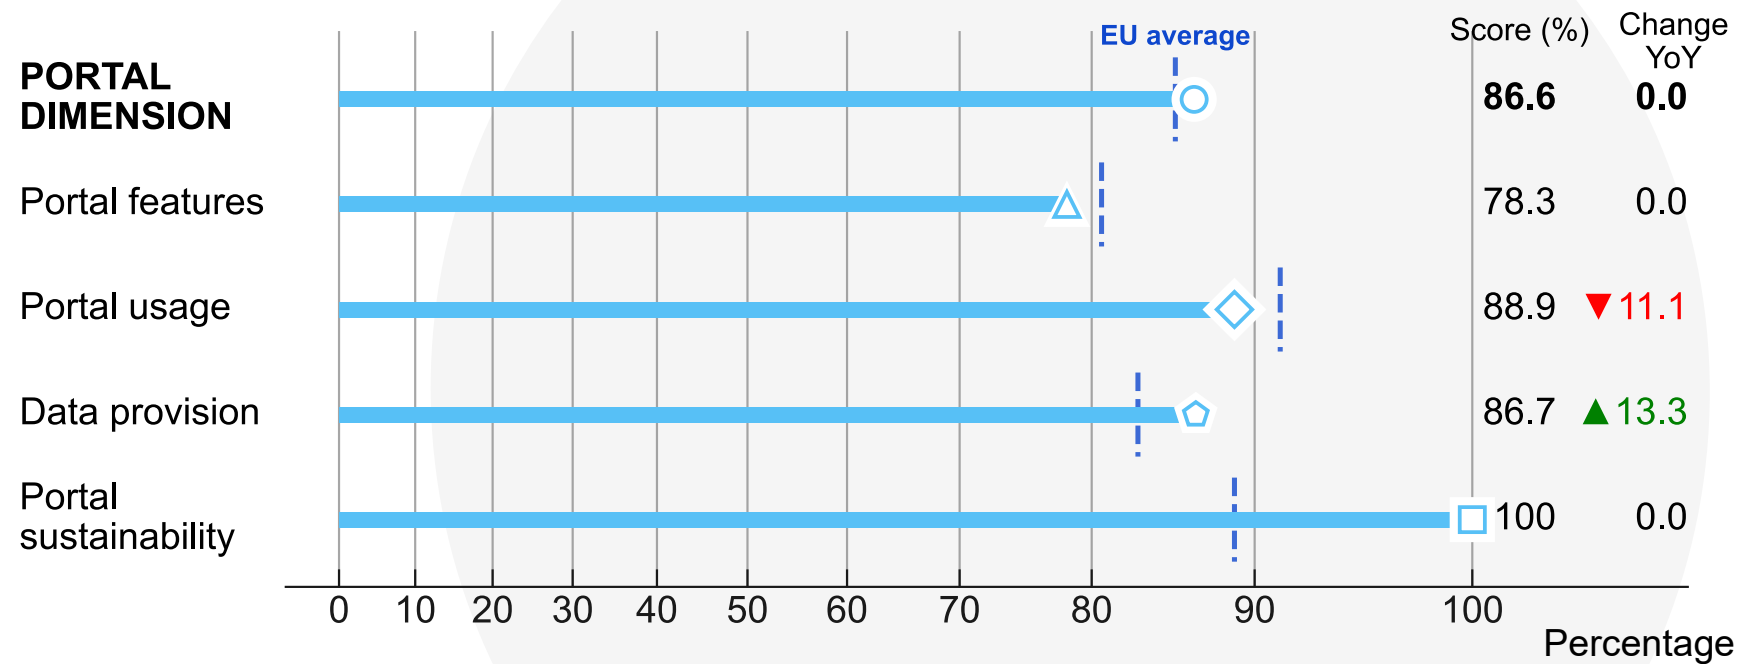

Key questions

- Does the national open data policy/strategy include an action plan?  Yes
- To what degree do local/regional public bodies conduct open data initiatives?  All
- Are there processes to ensure that the open data policies/strategy are implemented?  Yes

Portal dimension

2025 portal maturity scores of Slovenia

Key questions

- Do you monitor the portal's traffic?  Yes
- To what degree do public sector data providers contribute data to the portal?  All
- Does the national portal allow users to see what data exists but cannot be made available as open data?  Yes

Quality dimension

2025 quality maturity scores of Slovenia

Key questions

- Do you monitor the quality of the metadata available on your portal?  Yes
- Do you set any standards on metadata quality that data providers must abide by?  Yes
- Do you use a model to assess the quality of deployment of data in your country?  Yes

Impact dimension

2025 impact maturity scores of Slovenia

Key questions

- Do you have a definition of open data reuse in your country?  Yes
- Are there any processes in place to monitor the level of reuse of your country's open data?  Yes
- Do you have a methodology in place to measure the impact of open data?  Yes
