

Open data maturity

2025 country factsheet

State of play at a glance

Ukraine continued to make progress in strengthening its open data ecosystem through targeted policy reform, portal modernisation and capacity-building initiatives. The Strategy for the Development of the Open Data Sphere for 2025–2027, which sets out objectives for improving data quality, interoperability and stakeholder engagement, was finalised following a public consultation. This strategy was developed collaboratively and published on the Unified State Open Data Web Portal.

The Ministry of Digital Transformation led extensive training efforts, including nine regional sessions under the Open Data Academy and specialised programs for over 3 000 civil servants. The online course ‘Open Data for Civil Servants’ on Diia.Osvita reached over 70 500 completions. To support immediate technical needs, an Open Data Technical Support chat was launched via WhatsApp, enabling real-time assistance for data providers.

On the portal front, Ukraine finalised the technical and economic specifications for modernising its Unified State Web Portal of Open Data. Updated dataset publication guidelines and a comprehensive user survey informed improvements in usability and functionality. The Data+ communication platform played a central role in stakeholder engagement, hosting seven community meetings and serving as a hub for dialogue on open data policy and practice.

Quality enhancements included the development of a Unified Collection of Requirements for Compatibility of Open Data, which will standardise dataset formation, naming conventions and machine-readability.

Impact initiatives included the Open Data Hackathon and Accelerator, a student competition in data journalism and the launch of a university-level course on data journalism.

Assessment methodology

Open data maturity is measured on four thematic dimensions: policy, portal, quality and impact. Each dimension contributes an equal 25 % towards the overall maturity score.

Policy
Investigates the open data policies and strategies in place in the countries, the national governance models for managing open data and the measures applied to implement those policies and strategies.

Portal
Investigates the functionality of national open data portals, the extent to which users' needs and behaviour are examined to improve the portal, the availability of open data across different domains and the approach to ensuring the portal's sustainability.

Quality
Investigates the measures adopted by portal managers to ensure the systematic harvesting of metadata, the monitoring of metadata quality and compliance with the DCAT-AP metadata standard and the quality of the deployment of the published data on the national portal.

Impact
Investigates how well countries define and measure data reuse, the steps taken to assess reuse and user needs and the presence of reuse examples in the domains of government, society, the environment and the economy.

2025 maturity scores of Ukraine

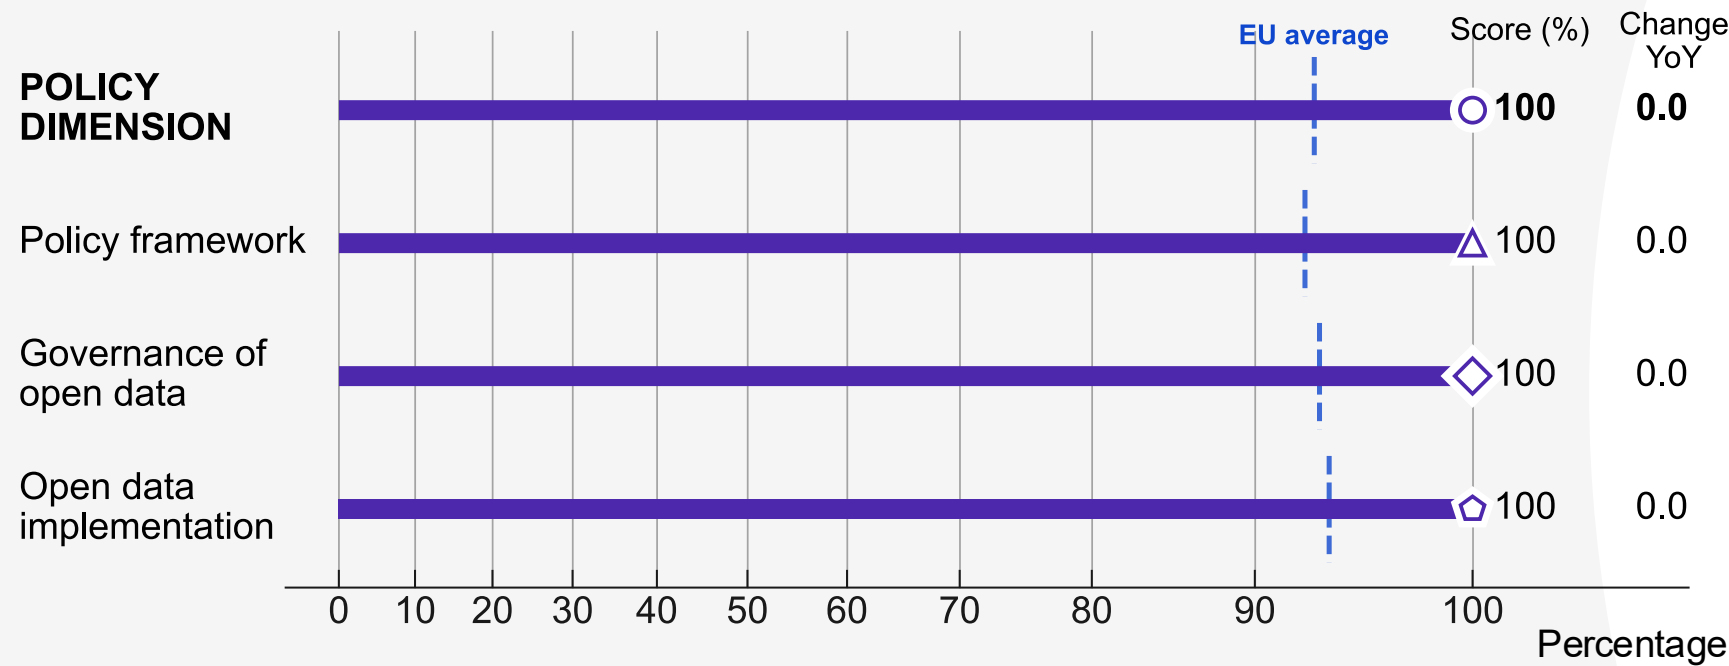

Maturity scores of Ukraine over time

Policy dimension

2025 policy maturity scores of Ukraine

Key questions

- Does the national open data policy/strategy include an action plan?  Yes
- To what degree do local/regional public bodies conduct open data initiatives?  All
- Are there processes to ensure that the open data policies/strategy are implemented?  Yes

Portal dimension

2025 portal maturity scores of Ukraine

Key questions

- Do you monitor the portal's traffic?  Yes
- To what degree do public sector data providers contribute data to the portal?  All
- Does the national portal allow users to see what data exists but cannot be made available as open data?  No

Quality dimension

2025 quality maturity scores of Ukraine

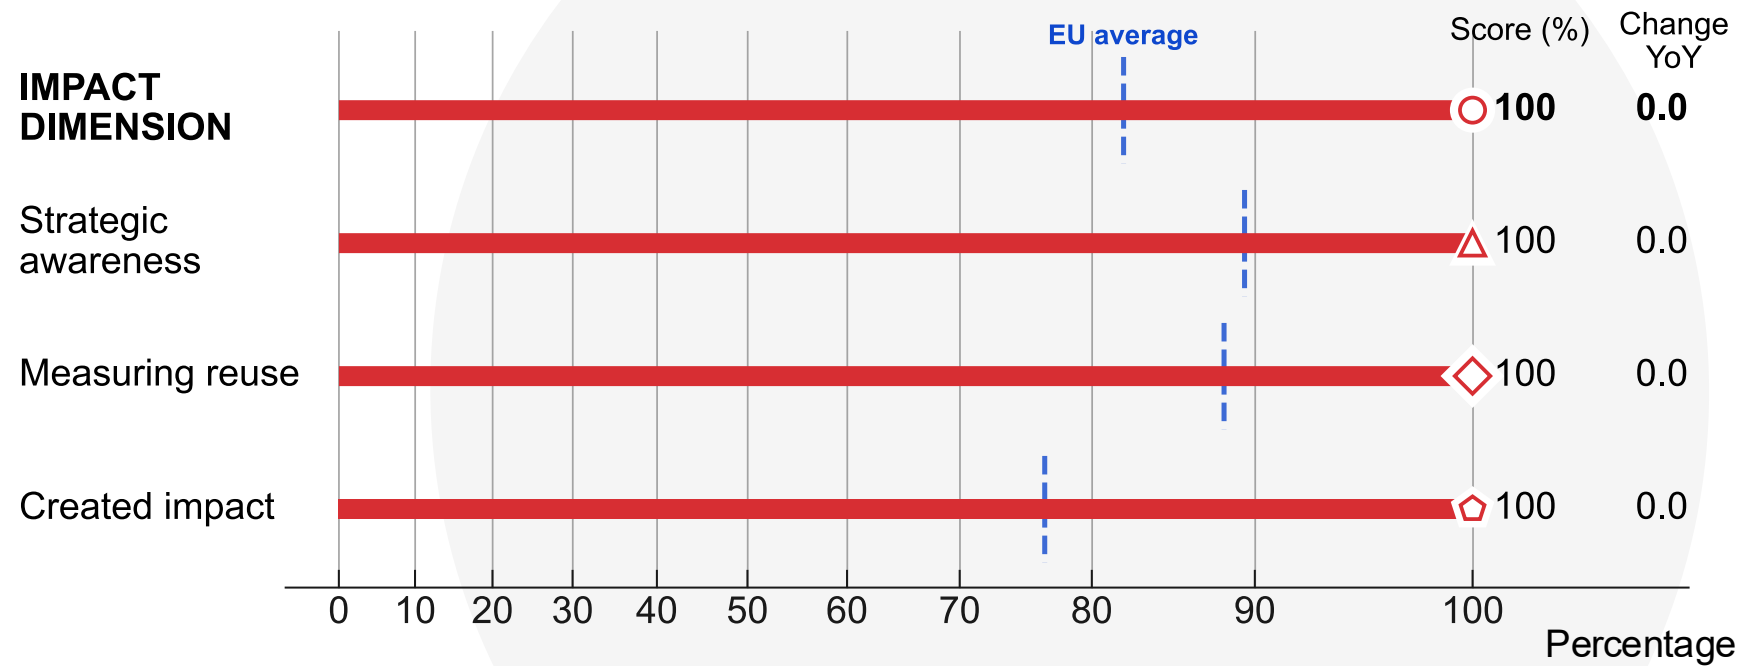

Key questions

- Do you monitor the quality of the metadata available on your portal? ☒ Yes
- Do you set any standards on metadata quality that data providers must abide by? ☒ Yes
- Do you use a model to assess the quality of deployment of data in your country? ☒ Yes

Impact dimension

2025 impact maturity scores of Ukraine

Key questions

- Do you have a definition of open data reuse in your country? ☒ Yes
- Are there any processes in place to monitor the level of reuse of your country's open data? ☒ Yes
- Do you have a methodology in place to measure the impact of open data? ☒ Yes
