

Geographic Information Today and Tomorrow—EUROGI imaGIne Conference 2013

Submitted on 07 Mar 2013 by ePSIplatform Team

How can the EU create social and economic added value based on the intelligent use, management and re-use of data sources? What role does Spatial Information play in the wider sphere of Public Sector Information? Professionals and experts from the world of Geographic Information will participate in the EUROGI imaGIne Conference today and tomorrow will seek to answer these and other timely questions. Participants will also examine a variety of European case studies and cover topics such as "Multi-media, Indoor/Outdoor, Cloud, Satellites," "Crowd Sourcing," and "Mobile and Linked Data."
