

URL <https://www.data.gv.at/anwendungen/48er-app/>**Quick facts**

 Company:	48er
 Sector:	Environment
 Product / service:	Application
 Type of data:	Geospatial and Government data
 Origin:	Austria

**Description**

The 48er application offers information on waste disposal locations across Vienna. The current locations of waste disposal sites and general street pick-up locations are presented on a city map. In addition, a calendar shows upcoming collection dates. The application is supplemented with current news and facilitates contact with various waste collection services.

**Benefits**

The application enables users to obtain information for the various garbage collection services in one central, user-friendly location. Through the live connection to Open Government Data Vienna (OGD) and the content of wien.at, the map is always up to date.

**How open data is used**

Die 48er combines various datasets from the City of Vienna on dog waste bag dispensers, public toilet facilities, mobile collection points for hazardous substances, manure pits, and used material collection points. These datasets are made available under a Creative Commons 4.0 Attribute License.
