### Quick facts

 Company:	City of Vienna
 Sector:	Regions & Cities
 Product / service:	Website
 Type of data:	Public data
 Origin:	Austria

### Description

Bäderampel (Bathroom Traffic Light) provides an overview of public pools and their current occupancy. As of the summer of 2020, and due to the measures taken in response to the pandemic, the number of available spots in public pools has been limited. Bäderampel therefore shows users where spots are still available.

### Benefits

The website provides users with a real-time overview of public pool locations. This can be viewed as a list or a map interface, and allows users to plan their visit with accurate and up-to-date information at hand. In light of COVID-19 restrictions on the number of visitors per location, Bäderampel is a useful tool.

### How open data is used

The application makes use of the swimming pools location map data made publicly available by the City of Vienna, and the basic administrative map of Austria, published by Geoland.at
