Quick facts

- 🌐 Company: SOBOS GmbH
- 🌐 Sector: Environment
- 🌐 Product / service: Application
- 🌐 Type of data: Water level data
- 🌐 Origin: Austria

Benefits

- 🌐 Promotes easy access to current and historic water levels.
- 🌐 Warns if local water levels rise dangerously, thus provides a warning function for individuals, companies and firefighters.

How Open Data is used

- 🌐 Pegelalarm uses Open Data about water levels from a multitude of regional and national institutions in the countries Austria, Germany, Switzerland, United Kingdom, Slovenia, Slovakia and Italy.
- 🌐 The data is made accessible with map views, visualisations and automatic threat warnings both via web and app.
- 🌐 For some regions, open web cams are also included.

Future plans

- 🌐 The developers aim for a continuous spatial expansion by including the data of even more measuring stations in order to eventually cover most parts of Europe.
