

URL <https://www.covidata.be/index/>**Quick facts**

 Company:	Covidata
 Sector:	Health
 Product / service:	Website
 Type of data:	Health data
 Origin:	Belgium

**Description**

Covidata is a website showing various statistics related to the COVID-19 pandemic, such as number of cases, deaths, hospitalisations, and the impact of lockdown measures on these numbers. Although the website is primarily designed to show data from Belgium and monitor how the country is handling the outbreak, international information is available as well. The website provides visualisations and dissects data on multiple levels, for instance by municipality, age group, or epidemic indicators.

Benefits

The website provides a wealth of information that is valid, reliable, and timely, enabling everybody to understand and objectively analyse the impact of COVID-19.

**How open data is used**

Covidata publishes all source code through a Github repository. The visualisations and data are distributed under a CC0 licence which makes it possible for everyone to access, alter, and publish the data.
