Quick facts

- Company: Gugalaga
- Sector: Population & Society
- Product / service: Platform
- Type of data: Open educational data and public data
- Origin: Croatia

Description

The platform allows parents to find and compare kindergartens in the city of Zagreb. Users see a map where they can search for kindergartens in specific locations, kindergarten programs, or other themes. If a user clicks on a kindergarten, the contact details and a link to the public website of the kindergarten appears. In addition, the platform allows people to rate a kindergarten and its services.

Benefits

- Parents can find the best possible kindergarten for their children according to their needs.
- The platform empowers users to compare and see all kindergarten in Zagreb in one place.

How open data is used

Gugalaga combines open data from the municipality of Zagreb and public data, which are a source for links to the official websites of the kindergartens. All data together build up to a map with marked kindergartens.
