Quick facts

-  Company: Ajapaik
-  Sector: Population & Society
-  Product / service: Platform
-  Type of data: Historic photographs and GPS
-  Origin: Estonia

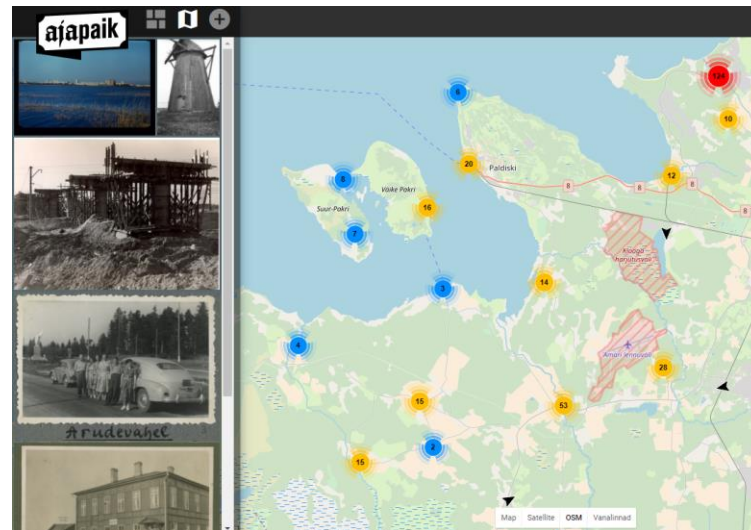

Benefits

-  Website visitors can discover how places in Estonia looked like in the past and how they have developed over time.

How Open Data is used

-  Historic pictures from Estonia's museums and other collections were geo-tagged and mapped. New pictures of the same places can be taken and submitted by contributors.

Future plans

-  More photographs will be added to the platform to display a more comprehensive view of Estonia's development. Re-taking historic pictures in the present is an objective to achieve better comparability with the past.
