<https://data.stat.ee/>**Quick facts**

-  Company: Statistics Estonia
-  Sector: Economy & Finance
-  Product / service: Website
-  Type of data: Economic data
-  Origin: Estonia

**Description**

Statistics Estonia provides several visualisations of economic figures for Estonia, Finland, Sweden, Germany, the Russian Federation, Latvia, and Lithuania. On the website, several graphs show actuals and trends of export and import products, trade balances, the destination and shipping countries of products.

Benefits

The dashboards on data.stat.ee allow users to visualise economic data on stacked charts or surface diagrams that show yearly, quarterly or even monthly data. The website is an easy-to-use interface that provides accurate and timely economic data to citizens across Europe.

**How open data is used**

The visualised data is provided by Statistics Estonia and published under an open data licence, meaning it can be freely and openly used by anyone for any purpose.
