 Company:	Estonian Open Data Portal
 Sector:	Education, Culture & Sport
 Product / service:	Platform
 Type of data:	Education data
 Origin:	Estonia

**Description**

Haridussilm, i.e., the Estonian Education Statistics Portal, provides data of primary, general, secondary, vocational and higher education, and monitors various indicators such as, success of lifelong learning or labour market statistics. The website provides a useful tool for education representatives and policy makers to keep track of their education strategy goals and quantify their progress towards those goals.

**Benefits**

On an intuitive, easy-to-use platform, users can dynamically create statistical reports and compare indicators such as exam results, or student satisfaction ratings across schools. The platform provides data on all levels on education and numerous performance indicators.

**How open data is used**

All data is obtained from the National Open Data Portal of Estonia.
