## Quick facts

 Company:	EuroVelo
 Sector:	Transport
 Product / service:	Website
 Type of data:	Geodata
 Origin:	Europe

## Description

EuroVelo provides a diverse range of cycling routes in different regions across Europe. Cyclists can use the map to look up cycle paths across Europe (and the United Kingdom). The map is up to date. The website also provides news items on cycling and holidays and supports a promotion campaign called 'Restart cycle tourism'.

## Benefits

- The map can be freely used by cyclists travelling across Europe, therefore stimulating cycling and potentially sustainable holidays and way of transportation.
- The website provides news pieces and in depth-information about cycling to users.
- The map provides information to visitors and developers.

## How open data is used

Geodata is used to produce a map with cycle paths. The map is set up by EuroVelo and the European Cyclists Federation. The map is free to use for all users. Users can search for cycling paths per region and route or per country in Europe.
