Quick facts

 Company:	Government of Issy-Les-Moulineaux
 Sector:	Economy & Finance
 Product / service:	Website
 Type of data:	Financial data
 Origin:	France

Description

As one of the earliest open data adopters in France, the city of Issy-Les-Moulineaux decided to publish its financial budget in 2011 to increase transparency. The city published the data onto their portal and asked a web agency to build a dedicated website to present the data in a user-friendly way by simply embedding the graphs coming from the portal. Every year, they update the graphs with data from a new financial report.

Benefits

The website provides descriptive context to the financial report's budget data for everyone to understand.

How open data is used

The government of Issy-Les-Moulineaux opens up their financial data to the public for everyone to use and read.
