Quick facts

-  Company: DFS Deutsche Flugsicherung GmbH
-  Sector: Transport
-  Product / service: Website & Application
-  Type of data: Transport and geo data
-  Origin: Germany

Description

FS Deutsche Flugsicherung GmbH is responsible for air traffic control in Germany and its headquartered is located in Frankfurt. It is a company organised under private law and 100% owned by the Federal Republic of Germany. DFS, which was officially founded in October 1992, is the successor of the Federal Institute of Air Navigation Services (BFS), a government authority, since 1 January 1993.

Benefits

The systematic analysis and networking of large amounts of data enables more efficient operations, a high level of cost-effectiveness, and lean and efficient processes.

How open data is used

The company uses transport and geo open data and specifically air traffic data to make better and safer decisions in air traffic control. More automated processes can make air traffic control safer.
