

URL <https://www.itu.int/en/action/gender-equality/>

Quick facts

-  Company: EQUALS (the Global Partnership for Gender Equality in the Digital Age)
-  Sector: Population & Society
-  Type of data: Women's rights, equalisation, geodata
-  Origin: Global 

Benefits

-  A map with projects that are working towards bridging the gender digital divide (more men than women working in the digital field). It is an interactive visualisation tool that maps information of approx. 400 initiatives worldwide. 

How Open Data is used

-  The website is based on desktop research data (Open Data) regarding initiatives to bridge to gender digital gap. The research data is validated by conducting interviews and surveys. The data found is classified according to a certain typology of the projects' aim, namely: ensuring women access to ICTs, increasing participation of girls in ICT studies and increasing the recruitment and retention of women in the ICT sector. 

Description

-  An interactive visualisation tool showing initiatives to bridge the gender digital divide
