

URL <http://datameet.org/>**Quick facts**

-  Company: DataMeet
-  Sector: Science & Technology
-  Product / service: Platform
-  Type of data: Government and geospatial data
-  Origin: India

**Description**

DataMeet is an open data community focusing on societal issues in India. The projects that are undertaken by the community cover a diverse range of topics. For example, “Know your MP” is a visualisation tool that maps out election affidavits. DataMeet bring together developers, data scientists and data enthusiasts, and they host hackathons, trainings and events to promote the use of open data, known as Open DataCamp.

Benefits

DataMeet offers a platform for anyone interested in working with open data to address India’s public issues. By bringing 1,500 members together, a huge knowledge-sharing platform is created where skilled enthusiasts can collaboratively work on societal issues.
