Quick facts

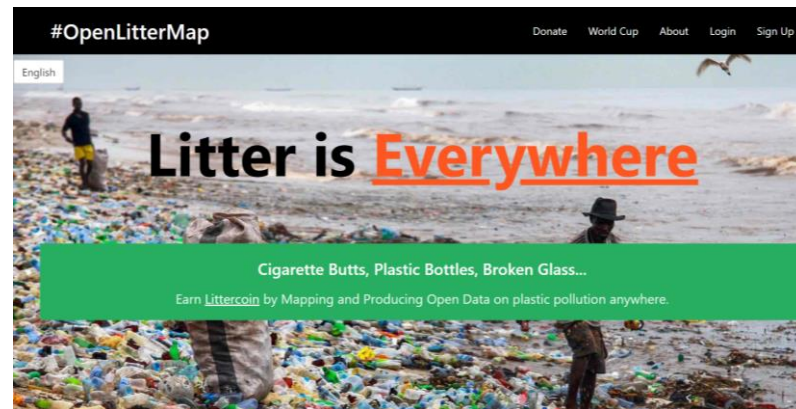

-  Company: Open Litter Map
-  Sector: Environment
-  Product / service: Website
-  Type of data: Geodata, Open Data on plastic pollution, coordinates of geotagged images
-  Origin: Ireland 

Benefits

-  Monitors and improves the cost-effectiveness and location of existing services, such as bins or clean-up routes.
-  Reduces the cost of littering and damage caused to biodiversity and ecosystem by litter and plastic pollution. 

How Open Data is used

-  Provides coordinates of geotagged inputs, the full OpenStreetMap address, over 100 pre-defined types of litter and its occurrence from the generated data.
-  The website shows a list of available litter bin locations based on user input. 

Future Plans

-  Reward people with blockchain tokens (Littercoin) to produce free and Open Data.
