Quick facts

 Company:	GeoHive
 Sector:	Education, Culture & Sport
 Product / service:	Platform
 Type of data:	Education and Geo-data
 Origin:	Ireland

Description

The School Information Map is a joint venture between the National Council for Special Education (NCSE), the Department of Education & Skills (DES) and Ordnance Survey Ireland (OSi). The platform provides the locations of schools, their contact information and information about the facilities available in those schools. It is an interactive tool that aims to make it easier to access schools' facilities and support offers for students with special needs on one platform.

Benefits

-  School Information Map allows users to easily see the location of different schools and gives information about the school, such as if they have facilities for special educational needs.

How open data is used

-  The School Information Map collects and uses data from the NCSE, DES and OSi in Ireland.
