<http://www.videssos.lv/>**Quick facts**

 Company:	State Environmental Service
 Sector:	Environment
 Product / service:	Platform
 Type of data:	Geospatial data
 Origin:	Latvia

**Description**

Vides SOS is an platform designed to alert the State Environmental Service of environmental hazards such as pollution, waste and litter in nature. Environmental infringements of the air (odours, dust, smoke, and radiation); the water (activities of edge fishing, presence of chemicals, dead animals, or oil); and the soil (waste, manure, and oil) can be reported. Depending on the case, the State Environmental Service cleans it up or users clean it up themselves and document it in the application.

Benefits

Vides SOS helps keep Latvia clean for its citizens and make sure the environment is protected from man-made waste.

**How open data is used**

Vides SOS makes use of the geospatial data made available under an open data license by Leaflet and OpenStreetMap.
