 Company:	Environment Agency of Luxembourg
 Sector:	Environment
 Product / service:	Application
 Type of data:	Environmental data
 Origin:	Luxembourg

**Description**

Meng Loft is the official air quality application of the Environment Agency in Luxembourg for mobile devices. The application makes it possible to check actual and historical trends, and monitor the main pollutants such as ozone (O3), nitrogen dioxide (NO2), and particulate matter (PM10).

Benefits

Meng Loft enables users to check the latest air quality data with Air Quality Index (AQI) for specific locations and to get recommendations on sports and health. In addition, the application provides pollution forecasts and alerts users in case a serious pollution is taking place (e.g. of ozone), thereby safeguarding the population's health.

**How open data is used**

MengLoft uses data published by the Luxembourg Government - Ministry of Sustainable Development and Infrastructure.
