Quick facts

 Company:	InTech SA
 Sector:	Transport
 Product / service:	Application
 Type of data:	Traffic data
 Origin:	Luxembourg

Description

Mobilux is a free mobile application that allows users to subscribe to real-time alerts for traffic and weather information. The application is connected to an open data streaming service and available for several mobile devices.

Benefits

The application allows users to access various types of information, for instance:

-  Highway travel times;
-  Bus delays;
-  Free access bike stocks; and
-  Weather data.

How open data is used

The source code of the application and the management server components are made available on GitHub as open-source. The data is obtained from various open data sources by the Ville de Luxembourg.
