Quick facts

- Company: Joint Research Centre (JRC)
- Sector: Regions & Cities
- Product / service: Platform
- Type of data: Regional and city data
- Origin: Luxembourg

Description

The Urban Data Platform is an initiative by the Joint Research Centre (JRC) and the Directorate General for Regional and Urban Policy (DG REGIO) of the European Commission. The platform is a core component of the Knowledge Centre for Territorial Policies and aims to provide users with access to information on the status and trends of European cities and regions.

Benefits

- The platform is free of charge.
- Users can visualise data on different aspects across European cities and regions and conduct a thematic analysis on the platform to gain insights based on indicators group by thematic categories or by Sustainable Development Goals (SDGs).

How open data is used

The platform collects various open data from across Europe, including territory data, population data, education data, mobility data, data on the SDGs and data on the quality of institutions based on the quality of government index.
