 Company:	Datagraver
 Sector:	Population & Society
 Product / service:	Website
 Type of data:	Demographics & environmental data
 Origin:	The Netherlands

**Description**

Datagraver started in 2014 and is part of Itude, an IT service provider. The service provides data insights to its clients with a focus on Population and Society data, but also provides insights on security, climate and politics. They use both big and small data for their research. Examples of customers are FNO, Zuiderzee Museum, municipality of Schiedam, Greenpeace, Algemene Rekenkamer, GroenLinks Noord Brabant, GGD Netherlands, municipality Krimpenerwaard en Graphic Hunters.

Benefits

Datagraver provides clients with valuable insights from open data. These data insights can help in improving their decision-making process.

**How open data is used**

Datagraver collects open data from the European and national portals (mainly from the Netherlands) and conducts research with this data. They share relevant data insights with their clients. Their specialisation is in population and society open data, such as demographics.
