Quick facts

- Company: Virostatiq.com
- Sector: Government & Public Sector
- Product / service: Visualisation
- Type of data: Government data
- Origin: Slovenia

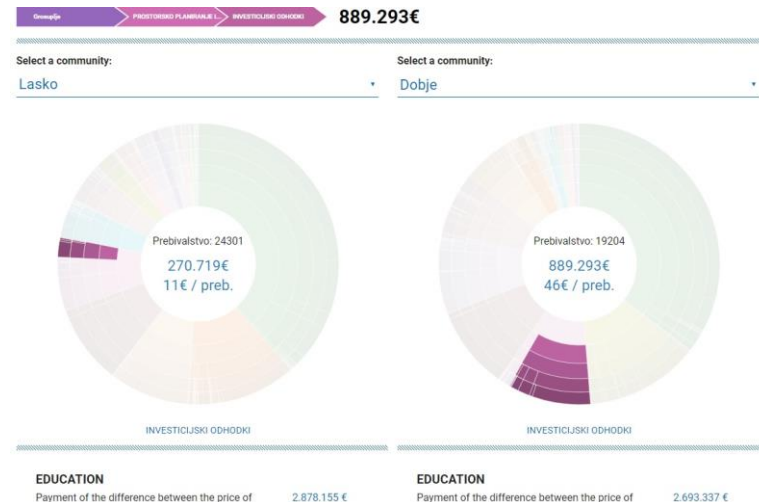

Benefits

- Municipal budgets are presented easily accessible and visually appealing.
- Boosts transparency, accountability and therefore democracy.

How Open Data is used

- Visualisation uses open budget data, being available since the adoption of the Slovenian Public Information Act, in Dec 2015.
- Provides capabilities of review, analysis and comparison of budgets between different municipalities or with the Slovenian average.
- Shows budget item per citizen.

Future plans

- The purpose of this project is to be a demonstration of the possibilities of using publicly accessible databases.
- It aims to improve the awareness for public sector data.
