 Company:	Sledilnik
 Sector:	Health
 Product / service:	Website
 Type of data:	Epidemiological data
 Origin:	Slovenia

**Description**

The purpose of the COVID-19 Tracker is to consolidate and present existing data in any form that is understandable, but nevertheless needs some clarification. The tracker is a not-for-profit initiative created to support the ongoing collection and editing of key coronavirus spread data in Slovenia. Recently they also added a European page to analyse the spread of the virus for other countries as well.

**Benefits**

Correctly collected, up-to-date and transparent published data is vital for the effective response of public healthcare systems to the COVID-19 pandemic.

**How open data is used**

The COVID-19 Tracker Slovenia's database, dashboard and analyses are all public and freely available for re-use.
