Quick facts

- 🌐 Company: Daia Intelligent Solutions
- 🌐 Sector: Agriculture, Fisheries, Forestry & Foods
- 🌐 Product / service: Company
- 🌐 Type of data: Meteorological Open Data portals
- 🌐 Origin: Spain

Benefits

- 🌐 Optimises water use in irrigation and promotes economic, social and environmental sustainability, which is cost saving for clients.
- 🌐 Their main product Aquidaia is a free app to calculate the correct amount of water for crops.

How Open Data is used

- 🌐 Daia Intelligent Solutions uses meteorological information from the nearest weather station to provide clients with information.
- 🌐 Daia utilises data mining techniques to integrate meteorological information from different sources such as Aemet, Euskalmet and Siar.

Future plans

- 🌐 Daia Intelligent Solutions will continue to develop tools based on artificial intelligence techniques and data mining to optimise water.
