### Quick facts

 Company:	Clic&Fish
 Sector:	Agriculture, Fisheries, Forestry & Foods
 Product / service:	Service
 Type of data:	Weather and water data
 Origin:	Spain

### Benefits

-  Clic&Fish allows fishermen to prepare for their fishing trips to Spain's rivers by providing real-time data on various factors, e.g. water temperature, wind. They can also interact and exchange information with others.

### How Open Data is used

-  The application combines live data on relevant fishing conditions (water temperature, wind, etc.) with a real-time content from cameras both above ground as well as under water. The users check conditions, plan where exactly they would like to fish, save their fishing history and communicate with other fishermen.

### Future plans

-  Available data is currently restricted to certain regions in Spain. It can be expected that, given increasing adoption among fishermen and satisfied feedback, Clic&Fish will continue to grow and expand to other regions in Spain.
