

URL www.flightradar24.com

Quick facts

-  Company: Flightradar24
-  Sector: Transport
-  Product / service: Website/Application
-  Type of data: Aircraft flight information
-  Origin: Sweden

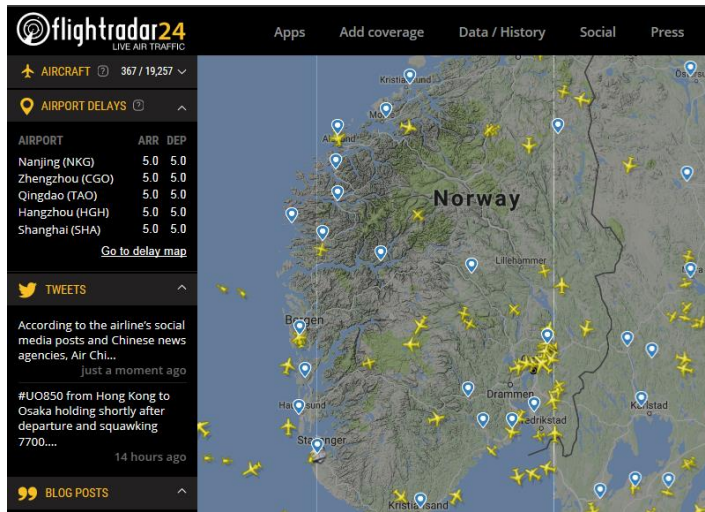

Benefits

-  Flightradar24 allows its users to track aircraft with real-time information.
-  Flightradar24 can show timelapse replays of previous tracks as well as historical flight data.

How Open Data is used

-  Flighttracker24 acquires most of its data through Automatic Dependent Surveillance-Broadcasts (ADS-B), a technology signaling and transmitting data of the aircraft (such as its location) that can be picked up by receivers. ADS-B data is unfiltered flight data and it is public and shared. Flighttracker24 has a receiver to obtain this data and structures it to show the actual location of aircrafts as well as information regarding departure- and arrival times.

Description

-  Tracks aircraft in real-time on a detailed map and provides flight status information
