Quick facts

-  Company: Zwemwater
-  Sector: Other
-  Product / service: Application
-  Type of data: Water data
-  Origin: The Netherlands

Benefits

-  Zwemwater shows to what extent outdoor swimming sights are clean and safe.
-  If a swimming sight is not safe and/or clean, Zwemwater advises its users not to swim at that location.

How Open Data is used

-  Zwemwater acquires its data from water authorities and the Department of Waterways and integrates it to provide an overview of outdoor swimming sights in the Netherlands regarding cleanliness and safety. The application tells the user whether or not it's advisable to swim at a certain swimming sight and it is up to the user personally to follow up on this advice.

Description

-  Provides water quality and services offered at swimming locations in the Netherlands
