### Quick facts

- 🌐 Company: Bellingcat
- 🌐 Sector: International issues
- 🌐 Product / service: Website
- 🌐 Type of data: Geospatial and news data
- 🌐 Origin: United Kingdom

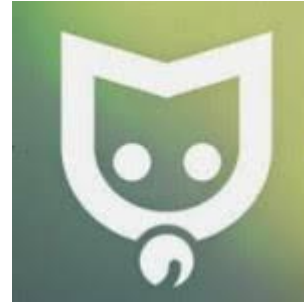

### Benefits

- 🌐 Bellingcat can verify evidence from video footage in war zones by using geospatial data to determine the location of where the footage was shot.

### How open data is used

- 🌐 Bellingcat uses satellite imagery to detect infrastructure changes, like the destruction or erection of buildings.
- 🌐 The company uses geospatial data to locate where certain footage was taken.

### Description

- 🌐 Bellingcat is a website for investigative journalism. The company uses open source and social media data to investigate a variety of topics. By using geospatial data, the company is able to find the original location where footage is shot. This information is used to verify the validity of footage.
