Quick facts

 Company:	Swirrl
 Sector:	Government & Public
 Product / service:	Company
 Type of data:	Public data
 Origin:	United Kingdom

Benefits

-  Swirrl's most popular platform is PublishMyData, a service that comprehensively analyses and sorts published data for local, regional and national governments.
-  Published data is shown in machine readable formats.

How open data is used

-  Swirrl receives open data from clients such as business organisations and local, regional and national governments.
-  The company then organises, analyses and publishes the data in machine readable formats for the client to understand and use.

Description

-  Swirrl is a Scottish tech start-up that aims to help organisations organise and publish their data. The company's platform PublishMyData is used by public and private sector groups to publish and manage their data by combining, contextualising and connecting the data.
