Quick facts

 Company:	Where Your Money Goes
 Sector:	Energy
 Product / service:	Website
 Type of data:	PER-databank
 Origin:	United Kingdom

Description

Where Your Money Goes is a graphical tool for examining gross (voted and non-voted) government expenditure over a period of ten years. The tool allows taxpayers to get a better view of how their taxes fund public goods and services.

Benefits

Transparency – The website allows users to chart the exact amounts of money being used by various government departments. Also, the website allows users to analyse where the money is being spent in each sector of each department.

Where Your Money Goes

How open data is used

The underlying data is retrieved from the Department of Public Expenditure & Reform-Databank (PER) and visualised on the website.
