Quick facts

- Company: SoundHound Inc.
- Sector: Education, Culture & Sport
- Product / service: Application
- Type of data: Audio data
- Origin: United States of America

Benefits

- SoundHound allows users to discover, search and play any published song, featuring voice control, and stores previous searches.
- Users can jump to different points of a song in the application by double-tapping a section of the lyrics, shown on the phone's screen while the song is playing.

How open data is used

- SoundHound collects data on songs and lyrics from databases such as Apple Music and LiveLyrics.
- The application allows users to find the song through voice recognition by playing a song or humming a melody against the phone's microphone when the application is open.

Description

- SoundHound is an audio and speech recognition company that develops voice-recognition, natural language understanding, sound-recognition and search technologies.
