

## URL

[Link to application](#)**Quick facts**

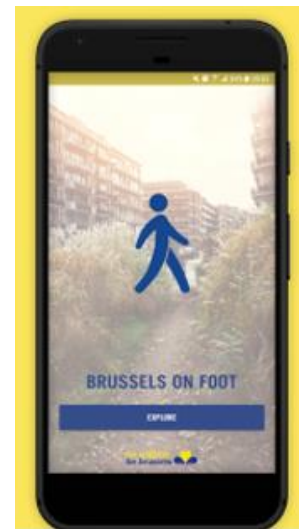

-  Company: appwise
-  Sector: Transport
-  Product / service: Application
-  Type of data: Geospatial data, points of interest
-  Origin: Belgium

**Benefits**

-  This application allows users to plan their own (walking) trail, and to navigate through Brussels. It also highlights points of interest.

**How Open Data is used**

-  Information on footpaths and points of interest is based on Open Data.

**Other information**

-  Gives a choice between prettiest (through parks for instance) and fastest route, drinking water points, public transport stops, playgrounds
-  The app is currently only available for Android, and later this year an iOS version will be launched.
