Quick facts

 Company:	Co-libry
 Sector:	Regions & Cities
 Product / service:	Platform
 Type of data:	Real-estate Data
 Origin:	Belgium

Benefits

-  Co-libry offers an unique combination of real estate, data, financial tools and content. It enables users to narrow down everything important when looking for a new home and provides all the necessary financial information related to the acquisition process.

How Open Data is used

-  The innovative real estate platform combines data from the real estate sector and financial tools to provide users with the necessary information related to their real-estate search. It provides tools such as calculators for loans and notary costs. The platform offers a user-friendly interface that guides the user through the complete real estate purchasing process.

Future plans

-  The company is currently funded under the European Commission's ODINE programme and is looking forward to what already appears to be a bright future.
