Spinque – Czech Restaurant Inspections

Application

Re-use

URL   http://www.spinque.com/czech-restaurant-inspections

Quick facts

- Company: Spinque
- Sector: Culture & Tourism
- Product / service: Service
- Type of data: Czech restaurant inspections
- Origin: Czech Republic

Benefits

- By using an app created by Spinque, users can find Czech food establishments, visualise them on a map, and read the statistics about the inspections at their premises.

How Open Data is used

- Records from the Czech inspection authority are processed by the Open Data Node architecture to republish them as high-quality Linked Open Data.
- Spinque technology is then used to create search strategies that search simultaneously through this dataset of inspections.

Context

- The demo search application developed by Spinque is an early-stage result of the EU-funded project COMSODE, a joint effort towards the standardisation of publication and exploitation of Linked Open Data.
