

URL <http://danmarksadresser.dk/>

Quick facts

-  Company: Geodatastyrelsen
-  Sector: Public
-  Product / service: Website
-  Type of data: Address data
-  Origin: Denmark

Benefits

-  Economic benefits are estimated to be DKK 800 million annually by 2020
-  Good complete address data saves lives in emergency situations

How Open Data is used

-  All Danish address data is published at one central website for everyone to use free of charge.
-  The centralisation of the address data makes it easier to improve the quality and standardise the data format.

Future plans

-  Continuous updates and further improvement of the quality of the address data.
