

URL <http://www.citysdk.eu/about-the-project/>

Quick facts

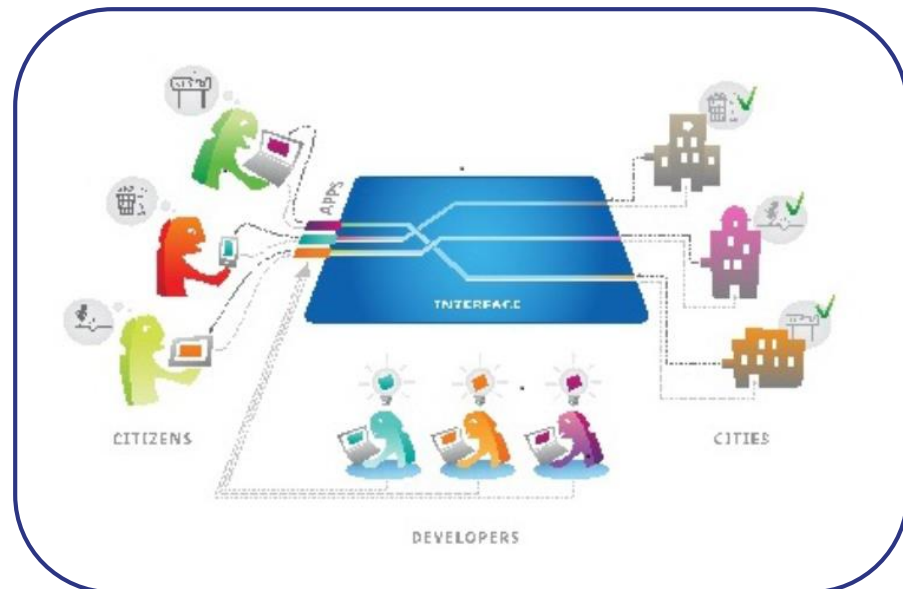

-  Company: CitySDK project
-  Sector: ICT, Government
-  Product / service: Service
-  Type of data: Multiple domains
-  Origin: EU (coordinated from Helsinki) 

Benefits

-  Boost development of applications and services in cities with data available through APIs.
-  Meet citizens' demands for 24/7 digital services. 

How Open Data is used

-  CitySDK is a “service development kit” for cities and developers, that aims at harmonizing APIs across cities.
-  The project focused on three pilot domains: Smart Participation, Smart Mobility and Smart Tourism. 

Future plans

-  The various partnerships provide further means for cooperation, sharing of experiences and practices, and finding synergies.
-  CitySDK provides an opportunity for developers to engage with their city – whether or not they are one of the 8 partner cities – by providing tools, interfaces and processes that can enable quicker implementation.
