Quick facts

 Company:	Bobby
 Sector:	Transportation
 Product / service:	Application
 Type of data:	Transport and Mobility
 Origin:	France

Benefits

-  It automates actions users do repeatedly during their daily commute, whether by car or by public transport
-  It streamlines the journey of users, making it safer and more time-efficient.

How Open Data is used

-  The Bobby team uses the MOBiNET Service database of transport and mobility data and the MOBiAGENT application to create a mobile app that triggers actions based on proximity and predefined waypoints.
-  It uses the Bordeaux Open Data portal <http://data.bordeaux-metropole.fr/>

Future plans

-  The application is already fully available in Bordeaux, France, but is looking to expand in other French cities such as Paris and Lyon.
-  Future functionalities include activating/deactivating vocal messages, and managing the number of stations or parkings that users would like to have in their results.
