Quick facts

-  Company: Androidsoft.org
-  Sector: Public
-  Product / service: Application
-  Type of data: Public Sector Information
-  Origin: France

Benefits

-  This application helps users discover trees of exceptional heritage.
-  Users can access the information from each tree by a proximity search, a map or through their camera for augmented reality.

How Open Data is used

-  The Paris City Council maintains approximately 300,000 trees on its estate. Of these, some are distinguished by their age, rarity of their essence, their history or their impressive measurements: the remarkable trees.
-  The mayor of Paris publishes Open Data on 60 of the most remarkable trees of the capital.

Other information

-  This application is offered by a group that provides open source software applications, using the Android platform.
-  Respect for users, including their personal data is a strong commitment of the group: this application contains no advertising and does not collect any personal information.
