Quick facts

- Company: Contagt
- Sector: Environment
- Product / service: Application
- Type of data: (indoor) location data
- Origin: Germany

Benefits

- This application enables building operators to manage their buildings more efficiently. With the app, visitors can view a building map, navigate indoors and report issues like defects or obstacles.

How Open Data is used

- The application uses open (indoor) location data.

Other information

- The application is available both for iOS and Android
- The application allows for individual routing (e.g. elevators instead of stairs) depending on user preferences.
