Quick facts

-  Company: ParkenDD
-  Sector: Transport
-  Product / service: Application
-  Type of data: Transportation
-  Origin: Germany

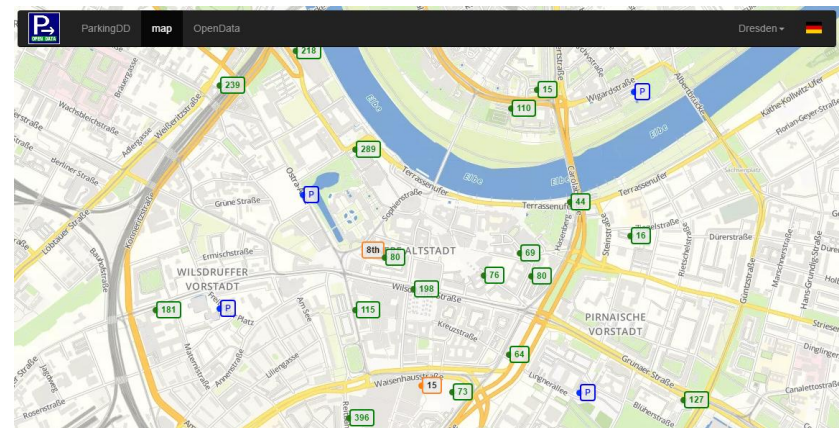

Benefits

-  ParkingDD shows users the current parking situation in different European cities. Depending on the data, you will receive the current number of free public parking spaces and their locations.

How Open Data is used

-  ParkingDD uses open data from various sources. Many cities in Germany and Switzerland use intelligent parking guidance systems and offer the data on the Internet. ParkingDD collects, structures, and displays the information to the user.

Other information

-  All the data using the app is freely available. The data is collected and processed via an interface to the app. All these components, the interface, the software for processing the data and, of course, the app itself are free and can be used and adapted by everyone.
