Quick facts

 Company:	Idalab
 Sector:	Economy & Finance
 Product / service:	Products
 Type of data:	Big Data
 Origin:	Germany

Benefits

-  Idalab is data science consultancy uses advanced analytics customised AI algorithms and mathematical models to build powerful data tools, that help businesses develop more comprehensive strategies.

How Open Data is used

With their intelligent zoning engine, Idalab has an algorithmic core which allows companies and institutions to intuitively solve a wide range of zoning problems. It enables them to designate different areas for specific uses – be it retail, schools, voting districts or distribution. The developed zoning engine – depending on the area of application – incorporates different open and proprietary datasets.
