Quick facts

 Company:	ENVI4ALL
 Sector:	Health
 Product / service:	Application
 Type of data:	Environment data
 Origin:	Greece

Benefits

-  ENVI4ALL is an application that provides information on the current, forecast, and historical air pollution levels for a specific location

How Open Data is used

-  By providing open data on air quality and user-generated (crowd sourced) information, it is possible to:
-  Get access to recent data from air quality monitoring stations in a specific location
-  See air pollution levels for the current and previous days
-  Get informed about air pollution forecasts for the following 3 days

Other information

-  It is also possible to: share one's perception on the current air quality in a specific location; see how other users feel about the current air quality; see air pollution trends; get notifications when elevated air pollution levels are forecast; and receive personalised health advice and tips to safely plan daily activities according to air pollution levels
